

Sleeve Washing

Flexo Industry

CleanSolutions

Sustainable cleaning solutions for all needs

- Specially designed to be used in FW cleaning units and ensure a long lifetime of your machines.
- Developed by cleaning experts with a focus on cleaning any type of ink or part without causing damage.
- Tailormade liquids for your specific needs.

✓ ISEGA-certified
✓ REACH-compliant

✓ ROHS-compliant
✓ Low COD solutions

✓ Low VOC solutions
✓ VOC-free solutions

Developed to ensure high print quality

The Flexo Wash cleaning systems are built to clean with sustainable cleaning solutions and to consume as little cleaning liquid as possible. In all our machines the liquid is always filtrated and recirculated to be reused.

The Flexo Wash solutions are of high durability and formulated for easy handling, trouble-free operation, and long service intervals. This makes sustainable cleaning liquids an affordable alternative to solvents, thus providing a safer cleaning of press parts and a cleaner environment.

The solutions are developed to meet today's demands of high print quality and productivity. This is only possible to obtain if you make sure that your aniloxes, printing plates, and other press parts are kept clean.

Specific inks require specific solutions

Automatic cleaning equipment is only as good as the liquid you use, which is why we do not compromise the quality, durability, and sustainability of our cleaning liquids. You need to use the right cleaning liquid, for the specific type of ink, in your cleaning machine to get the optimal cleaning results.

Our own Flexo Wash consumables brand

CleanSolutions offers many types of liquids. Additionally, we offer filters, brushes, sponges, and manual cleaning equipment.

Let us guide you towards better cleaning

We are always ready to guide you towards better and more efficient cleaning of your aniloxes, plates, parts, screens etc. based on your specific combination of inks or varnishes.

We can provide liquids that work best with our cleaning systems, but also cleaning liquids for all other cleaning machine brands.

Minimal impact on environment

Flexo Wash continues to develop cleaning solutions with a focus on minimizing the environmental impact and you will find both low VOC and VOC-free cleaning solutions in the Flexo Wash product portfolio as well as food packaging-compliant solutions certified by ISEGA.

We also offer cleaning solutions with a low COD (chemical oxygen demand), which reduces the oxygen demand in the wastewater.

CleanLink

- to your cleaning unit

- Remote service
- Real-time data
- Operator app

Get access to real-time data and the status of the machine, all at your fingertips! Whether you're on the go or in the office, you can monitor the performance of your cleaning unit and make adjustments as needed. No more guessing or wondering if your machine is working properly - the CleanLink system gives you the peace of mind you need to focus on other important tasks. Plus, with remote service capabilities, you can have any issues addressed quickly and efficiently.

Sleeve Washing

Flexo Wash offers a variety of equipment for cleaning of sleeves of all dimensions and types. The sleeve washers will clean all types of rubber sleeves, laser-engraved print sleeves, plates mounted on sleeves etc.

Flexo Wash supplies two types of washing units for sleeves:

- Single sleeve washing
- Multiple sleeve washing

Our Solution

- Fully automatic and extremely gentle cleaning process for all types of ink
- Minimal maintenance is required
- The unit has a long life time
- Environmentally friendly cleaning

Sleeve Washing

The Flexo Wash Way

All Sleeve Washers are designed to clean all types of print sleeves and all types of inks. The eco-friendly cleaning liquids from Flexo Wash are specially developed to efficiently remove the different types of inks from the sleeves in only a few minutes.

Washing

This unique combination of the FW cleaning liquid and soft rotating brushes ensures an effective cleaning without any risk of damaging the plate or sleeve. The sleeve is rotating during the entire process thus ensuring an even and thorough cleaning.

Re-use

The cleaning liquid is filtrated and recirculated to be reused to minimize liquid consumption. The rinse water can also be led to a recirculation unit (optional) to be filtrated and ready for reuse.

Draining

After the washing cycle the liquid is drained back to the wash tank. Drain time is 2-3 minutes.

Drying

Finally, the water is removed from the sleeve by compressed air. The sleeve rotates during the entire process, which only takes about 10 minutes. Afterwards the sleeve is clean and dry and can be stored or put into production immediately.

Rinsing

Thereafter, the sleeves are after rinsed with high-pressure water.

Case Story

In order to keep up with the amount of sleeves that needed washing every day, Danish printer company Amcor invested in a multi-sleeve unit from Flexo Wash.

"Compared to having a wash unit for only one sleeve, we are today, with the Sleeve Washer, saving around 10 man hours per day", Print Supervisor Mogens Gloggenhieser explains, "And the operator can now focus on other press-makeready functions instead of washing."

When asked about comparing the Sleeve Washer with manual washing of the sleeves, Gloggenhieser replies: "We have always used automatic equipment to wash our sleeves and I can only imagine how many man

hours could be saved by going from manual washing to the Sleeve washer from Flexo Wash."

Always 100% clean sleeves
The Amcor Sleeves are taken to the wash room directly after printing, where they are cleaned within 2-3 hours before being left for storage.

"In this way we always have 100% clean sleeves and we never have to worry about problems occurring from dirty sleeves", says Gloggenhieser and continues:

"The 10 minute wash cycle fits our working routine very well and the flow of sleeves from printing to washing to storage works very well for us."

"... I can only imagine how many man hours could be saved by going from manual washing to the Sleeve washer from Flexo Wash"

1: Washing, 2: Draining, 3: Rinsing, 4: Drying

Sleeve Washing

Gentle & efficient cleaning

The unique technology combines the use of cleaning liquid, brushes, high-pressure water, and compressed air, which ensures a gentle and efficient cleaning of the sleeve.

In all sleeve washers it is possible to wash sleeves of various lengths and diameters. Rubber cones or adaptors in the machine ensure that liquid does not enter the inside of the sleeves.

Before

After

1. When cleaning multiple sleeves, the high-pressure water nozzles gently rinse the sleeves before the air stream dries the surface.
2. Both the nozzles and brushes are placed on a movable bar which moves up and down during the wash cycle (multiple sleeve cleaning).
3. The multi-sleeve cleaning unit is equipped with special-made soft brushes that ensure efficient yet gentle cleaning of the sleeve.
4. In the single-sleeve cleaning unit the nozzle and air stream are also placed on a movable bar moving from one side to the other during the wash cycle.
5. The process indicator lamp lights green when the cleaning cycle is in progress.
6. The full-length special-made soft brush ensures a high-quality cleaning result in the single-sleeve cleaning unit.
7. In the multi-sleeve cleaning machine, the top bar is adjustable making it possible to wash sleeves of various lengths in the same machine.

Sleeve Washing

Which machine should I choose?

Flexo Wash offers a variety of solutions for cleaning of sleeves of all dimensions and types. The Sleeve Washers will clean all types of rubber and laser-engraved sleeves. Plates mounted on sleeves can be cleaned as well.

	Max sleeves per wash	Max diameter	Max cleaning length
SL 2000.NXT	1	340 mm (13,4")	1380 mm (54,3")
SL 2500.NXT	1	340 mm (13,4")	1880 mm (74")
SL3000 DLE.NXT	1	450 mm (17,7")	2500 mm (98,4")
SL 6V	6	300 mm (11,8")	1700 mm (69,9")
SL 6V XL	6	350 mm (13,8")	1700 mm (69,9")
SL 6V XXL	6	350 mm (13,8")	2200 mm (86,6")
SL 8V	8	280 mm (11")	1700 mm (67")

Single sleeve washing

With the SL 2000-2500.NXT-series Flexo Wash presents a new generation of cleaning machines. All units are produced with the .NXT features which means easier handling, improved technology, focus on less liquid consumption and sustainable solutions.

Multiple sleeve washing

With the SL 6/8V, you can clean up to 8 sleeves simultaneously in one single unit. The machine is designed to clean all types of inks with eco-friendly cleaning liquids. The sleeves are easily loaded into the machine vertically.
